1 Port of Rostock

UN/LOCODE code: DERSK
Time Zone: GMT +1

Facilities for :

* bulk * dry cargo * ro-ro * liquid * gas * passenger * multipurpose * ferry

2 General Overview

2.1 Port Authority

Hafen- und Seemannsamt Rostock
Schiffsmelde- und Verkehrsleitstelle (24/7)
Tel: +49 381 381 8700
Mob: +49 171 860 4436
Fax: +49 381 381 8735
VHF: ch 10 - call "Rostock Harbour"
Internet: https://rathaus.rostock.de/de/service/aemter/hafen_und_seemannsamt/251664
E-Mail: port.authority@rostock.de

Adress: Ost - West - Straße 8
18147 Rostock - Überseehafen
PO-Box 48 10 46

2.2 Location

Rostock is located in the W-part of the Baltic Sea, at the estuary of the river Warnow,
Lat: 54°09'N Long: 012°06'E.
Rostock is the largest port of Mecklenburg-Vorpommern. In 2023 the total amount of the cargo handling achieved a volume of 32,2 milion tons.

2.3 Tidal range and flow

Tide is insignificant, but strong winds from S directions may lower and gales from N directions may raise the water level up to +/- 1.5m.

Weather

Prevailing winds: Westerly

Ice

The river Warnow at the old City port as well shallow waters in the estuary normally freeze in the winter, but the channels are kept open as long as possible, and the ports are rarely closed.

Density

Because of the river Warnow the water in the port of Rostock is brackish with a density of approx. 1,008 kg/m³.

2.4 Restrictions and Shipmax

No obstacles, no locks, bridges etc.; no restrictions for entering at night normally.
Depending of port and berth usually Rostock can handle vessels up to LOA 330 m or BOA 50 m with draught of max.13,00 m. Vessels which exceed defined parameters are requested to obtain a permission from Port Authority, especially if bound for Fracht- und Fischereihafen as well old City Port.

2.5 Anchorages

In the roads, 2-6 nm NW of Warnemunde, there are two recommended anchorages with a depth of 13-17 m, bottom mud and sand. They are unsheltered from W, N and NE winds. Anchorage No.2 is reserved for tankers and vessels with dangerous cargo; Anchorage No.1 for other vessels.

For further informations call VTS Centre "Warnemünde Traffic" an VHF-Channel 73 as per chapter 2.8.

2.6 Approach, Traffic Schemes, Sea buoys, fairways and channels

Boy "Rostock" is the approach for the Ports of Rostock situated at the Bay of Mecklenburg and leading with a buoyed and lighted fairway, approx. 9,1 nm in length and max. 15 m draught to Warnemuende and the Ports of Rostock.

2.7 Vessel Traffic Service (VTS Centre)

"Warnemuende Traffic" monitors permanently all traffic between the approach buoy, anchorage and the Ports of Rostock. Each vessel exceeding LOA of 30 m has to be contacted via **VHF ch 73** minimum 30 min before entering traffic area.

VHF: ch 73 - call "Warnemünde Traffic"
Tel: +49 381 206 71 841
Fax: +49 381 206 71 845
Email: vkz-warnemuende@wsv.bund.de

2.8 ETA-Reporting, National Single Window

Arrival notification, port notification and departure notification are parts of required notifications according to respective federal or federal state laws or regulations and could be delivered directly and legally binding to the respective responsible authorities either via the web-based reporting client of the "National Single Window" or via reporting interfaces (port community information systems) of the "National Single Window".

More informations and legal regulations are given on www.national-single-window.de.

2.9 Pilot

Pilots operate around-the-clock and monitors VHF-channels.

Compulsary pilotage for the ports of Rostock can be checked at the following homepage:

https://www.wismar-rostock-stralsund-pilots.de/en_order_Rostock.html

Pilots Association "WIROST"

VHF: ch 14 - call "Warnemünde Pilot"
Tel: +49 381 2060 350
Fax: +49 381 2060 351
E-Mail: info@rostockpilot.de
Internet: https://www.wismar-rostock-stralsund-pilots.de/en_index.html

Duty Pilot

VHF: ch 14 - call "Warnemünde Pilot"
Tel: +49 381 2060 350
Fax: +49 381 2060 351
E-Mail: station@rostockpilot.de

2.10 Towage

Towage is compulsory as follows:

<https://rathaus.rostock.de/de/aemter/354470>

Minimum bollard pull of 30 tons is required as well 150 tons by assistance with 4 tugs.

Tugs available up to 52 tons bollard pull.

Vessels bound for berth no. 3 at oil harbor exceeding LOA 220m are requested to order minimum 4 tugs for arrival and 3 tugs for departure.

More informations and regulations are given on <https://rathaus.rostock.de/de/aemter/354470>
(Mindestpfalzugs und -anzahl_Schlepper)

Towage Companies

Fairplay Towage Group

Tel: +49 381 54 83 135
Fax: +49 381 548 31 50
E-Mail: rostock@fairplay-towage.com

Boluda Towage Europe

Tel: +49 40 74 11 88 15
Internet: <https://www.boluda.eu/contact-us>

2.11 Mooring Service

Vessels exceeding 1.000 BRZ are requested to order mooring service for berthing and unberthing. Vessels not exceeding 2.000 BRZ are free to shift along the berth without mooring service.

2.12 VHF-Channels

"Warnemünde Traffic"	VHF Channel 73	VTS
"Warnemünde Pilot"	VHF Channel 14	Pilotage
"Rostock Harbour"	VHF Channel 10	Port Authority, Port Control for all Ports of Rostock
"Marienehe Port"	VHF Channel 13	Port Operation at Fishery Port

2.13 Documents

Customs: Cargo Manifest, Ship Store's Declaration, Crew's Effects Declaration (www.zoll.de)

Port Authority: International Tonnage Certificate 1969 (ITC 69)
Classification Certificate
IOPP
Type Approval of Ballast Water Management System

Immigration, Port Health Authority: are parts of required notifications according to respective federal law and could be delivered directly and legally binding to the respective responsible authorities either via the web-based reporting client of the "National Single Window" or via reporting interfaces (port community information systems) of the "National Single Window".

Further informations as per chapter 2.9 ETA-Reporting, National single Window.

2.14 Coast Guard / Police

Contact via VHF ch 73 -Warnemünde Traffic (VTS-Centre) - or VHF ch 10 -Rostock Harbour- (Port Authority)

2.15 Maritime Emergency / Rescue

The DGzRS (Deutsche Gesellschaft zur Rettung Schiffbrüchiger = German Maritime Search and Rescue Service) is responsible for the maritime search and rescue service in the German areas of the Baltic Sea (VHF Ch. 16 – Bremen Rescue).

The Central Command for Maritime Emergencies (CCME) (Havariekommando) is a joint institution of the German Federal Government and the Federal Coastal States. It was established to set up and carry out a mutual maritime emergency management in the Baltic Sea.

E-Mail: lz@havariekommando.de.

2.16 Fire Fighting

Shore and water based fire brigade available.

2.17 ISPS

The Ports of Rostock (see GISIS: Maritime Security) operating according ISPS.

2.18 Dangerous Goods

Notifications about dangerous or polluting goods carried on board has to be reported upon arrival and at the latest at the departure of the ship from the port.

Dangerous Cargo can be handled, prior notice to Port Authority is compulsory.

2.19 Port State Control

Port State Controls will be carried out.

2.20 Maritime Declaration of Health

Port State Controls will be carried out.

2.21 Disposal of Garbage and Sludge

The disposal of ship generated waste under the scope of Annexes I, II, IV, V and VI of the MARPOL Convention is subject to the law governing the disposal of ship-generated wastes and cargo residues in the federal state of Mecklenburg-Vorpommern (SchAbfEntG M-V). Therefore, accordingly, Port reception facilities are available.

In the interest of protecting the marine environment, all ships are required to dispose of their wastes and cargo residues in each port of Call. The Notification of waste disposal is to be made electronically via the input interface of the National Single Window (NSW). For further specific Information please contact the Port agents (See attached List) or Port authority.

2.22 Ballastwater Treatment

Since enforcement of the International Ballast Water Convention in 2024 the D2-Standard apply to the treatment of ballast water accordingly. A limited transition period has expired. Depending on the BWTS used holding times must be observed in accordance with the Type Approval of the system.

2.23 Dry Bulk Cargo Handling

For safe loading and unloading of bulk carriers harmonized rules and procedures apply under the scope of Annexes I, II, III, IV, V and VI of the EU Directive 2001/96/EG. A consistent exchange of information between the master of bulk carriers and the bulk terminal is required to ensure by means of coordinated loading/unloading sequences and safety checklists.

2.24 Veterinary Station

Handling of animal products and live animals are available; prior the permission of veterinary station is compulsory.

2.25 Diving

Diving operations can be undertaken. There are several diving companies in Rostock.

2.26 Repair Facilities

Repair work can be undertaken. There are several companies in Rostock available.

2.27 Bunkering

Bunkers can be supplied in the anchorage no. 2, in the ports via barge or truck. Also the port authority examines and grants permit for bunkering of deep-frozen liquefied natural gas (LNG).

2.28 Fresh Water

Fresh water can be supplied via wharf. Please contact the port agents (see attached list) or port operators.

2.29 Ship Suppliers

There are several ship suppliers in Rostock available.
